

Authors Sought for Update to Joint WEF/ASCE/EWRI Manual of Practice for Design of Urban Runoff Controls

The EWRI Stormwater Infrastructure Committee has agreed to act as the EWRI Coordinator for the **Update to Joint WEF/ASCE/EWRI Manual of Practice for Design of Urban Runoff Controls**.

Task 1 - Aid in identifying appropriate authors for WEF.

Task 2 – Develop a “blue ribbon” panel of reviewers. The reviewers can not be authors, and will be required to submit a brief vita.

Discussions on both tasks will take place during the EWRI Stormwater Infrastructure committee meeting as part of the EWRI Tampa Conference. We have requested an afternoon meeting for Monday afternoon preceding the conference.

If you wish to be included in this process,

Authors – Contact WEF’s Technical Publications Manager, Lorna Ernst, with a brief resume at lernst@wef.org or FAX 703-836-1794 (please indicate whether you are interested in serving as an author or reviewer; authors should also indicate in which chapter they are interested).

Reviewers – This will be discussed in our Tampa meeting. To indicate preliminary interest contact Robert Traver – Robert.traver@villanova.edu.

Note you do not need to become a SWI committee member to be involved in this EWRI effort, but feel free to visit our webpage to follow our progress.
